Storage and Security

1.) How many firearms do you have? → 2.) Is your storage location occupied or unoccupied?

3.) What categories of firearms do you have?

Category	< = 5		6 - 15		16 +	
	Occupied	Unoccupied	Occupied	Unoccupied	Occupied	Unoccupied
A & / or B	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Level 1 (3mm steel body & 6mm steel door)	Level 1	Level 1 + Alarm	Level 1 + Alarm	Level 1 + Alarm + CCTV
Including any C & / or E6	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Level 1 + Alarm	Level 1 + Alarm	Level 1 + Alarm + CCTV	Level 1 + Alarm + CCTV	Level 2 + Alarm + CCTV
Including any H	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 2 (6mm steel body & 10mm steel door) upon addition / replacement of firearms. *New applicants	Level 2 + Alarm	Level 2 + Alarm	Level 2 + Alarm + CCTV	Level 2 + Alarm + CCTV	Level 3 (Grade V Safe) + Alarm + CCTV
E (other than E6)	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants	Grandfathering of existing approved storage (existing licences ONLY) **Upgrade** to Level 1 upon addition / replacement of firearms. *New applicants

Storage and Security Matrix

Storage matrix for all licences, except for Trade Licences, can be found above (and on the last page).

Please refer to Schedule 6 of the *Firearms Regulations 2024* to understand what level of alarm system is required for your circumstances.

How to read the storage matrix:

1. How many firearms do you have? Less than 5, between 6 and 15, or more than 16.
2. Is your storage location occupied or unoccupied? E.g., inside the house you reside in (occupied), in a shed in the backyard (unoccupied), etc.?
3. What categories of firearms do you have? Category A, B, C, E and/or H. Where you have more than one firearm, select the highest calibre.

Example 1:

The firearm authority holder has four (4) Category A & B firearms at an occupied premises. They can retain their existing approved storage until they either replace a firearm or get an additional firearm.

Example 2:
A firearm authority holder has seven (7) Category A & B firearms and two (2) category H firearms at an unoccupied premises. They require a Level 2 cabinet with alarm and CCTV for all firearms stored at that location.

Notes:
Alarm means Operational Level 1 or 2 alarm system.
CCTV means Operational video surveillance system.

Storage Level Specification

Level 1
- 3mm steel cabinet – 6mm steel door*; **or**
- Grade V safe as determined by *AS/NZS 3809:1988 Safes and Strongrooms*, **or**
- Compliant secure room or strong room.

  * These specifications provide for composite constructed cabinets e.g., steel/concrete/steel.

Level 2
- 6mm steel cabinet – 10mm steel door*; **or**
- Grade V safe as determined by *AS/NZS 3809:1988 Safes and Strongrooms*, **or**
- Compliant secure room or strong room.

  * These specifications provide for composite constructed cabinets e.g., steel/concrete/steel.

Level 3
- Grade V safe as determined by AS/NZS 3809:1988 Safes and Strongrooms, **or**
- Compliant secure room or strong room.

Strongroom
- Has a resistance rating of at least XI as determined by *AS/NAZ 3809:1988 Safes and Strongrooms.*

Secure Room
- As per Schedule 5 – compliant secure room requirements (*Firearms Regulations 2024).*

Shared compliant storage (*s.311 (3) Firearms Act 2024, r. 284 Firearms Regulations 2024).*

Firearms authority holders may store their firearms in the same cabinet at an approved storage location if:
- The firearm is rendered temporarily inoperable, including, for example, by:
  - Using a trigger or action lock; **or**
  - Removing a bold, firing pin or major firearm part from the firearm.

For example, a family could store all their firearms in one large cabinet, so long as they are made temporarily inoperable, so other family members with access to the firearms cabinet cannot use the firearm.

Operational alarm system (*r.267 Firearms Regulations 2024).*

Operational Level 1 alarm system – must meet **or** exceed the following when armed:

- The system has motion sensors that can detect movement in the storage place;
- The motion sensors display lights are not illuminated when movement is detected by the sensor;
- The system sounds an alarm when motion is detected by the motion sensors;
- At least one (1) person who stores firearms at this storage place is notified that motion is detected by the motion sensors;
- The system otherwise substantially complies with the recommendations, requirements or other provisions that apply to alarm systems under AS/NZA 2201.1:2007.

Operational alarm system (*r.267 Firearms Regulations 2024).*

Operational Level 2 alarm system – must meet **or** exceed Operational Level 1 alarm when armed, as well as:

- The system has seismic sensors to detect whether a firearm repository within the storage place is the subject of a physical attack, or an attempt to move the firearm repository from the storage place;
- The system sounds an alarm when the seismic sensors detect a physical attack on a firearm repository or an attempt to move the firearm repository;
- At least one (1) person who stores firearms at the storage place is notified the seismic sensors detect a physical attack on a firearm repository or an attempt to move the firearm repository;
- The system has a duress alarm allowing a person to activate the system or an alarm, by for example, pressing a button;
- The control panel for the system is in a part of the storage place that is not accessible to the public.

Both Operational Level 1 and Operational Level 2 alarm systems must operate in the entirety of the storage place; and the areas outside the storage place from which the place can be accessed

Note:
Both systems require a schedule of maintenance. The Regulator may request a record showing work carried out maintaining the compliant alarm system within the previous five (5) years from the date of notice.

General Storer Operational Alarm Requirements

Alarm matrix – Individual Licence, Primary Producer Licence, Collector Licence, Club Licence, Range Licence Holders.

Category	**<=5**		**6-15**		**16+**	
	Occupied	Unoccupied	Occupied	Unoccupied	Occupied	Unoccupied
A &/or B				Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm
Including any C &/or E6		Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm
Including any H		Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm
E (other than E6)						

Alarm matrix – Business and Government Entity Licence Holders.

Category	**<=5**		**6-15**		**16+**	
	Occupied	Unoccupied	Occupied	Unoccupied	Occupied	Unoccupied
A &/or B				Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm
Including any C &/or E6		Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm	Operational level 1 or 2 alarm
Including any H		Operational level 2 alarm	Operational level 2 alarm	Operational level 2 alarm	Operational level 2 alarm	Operational level 2 alarm
E (other than E6)						

Both Operational Level 1 and Operational Level 2 alarm systems are compliant. Where the matrices indicate a choice, Operational Level 1 is mandatory, and Operational Level 2 is voluntary. Where it stipulates Operational Level 2 alarm only, this greater level is mandatory.

How to read the alarm matrices:

1. How many firearms do you have? Less than 5, between 6 and 15, or more than 16.
2. Is your storage location occupied or unoccupied? E.g., inside the house you reside in (occupied), in a shed in the backyard (unoccupied), etc.?
3. What categories of firearms do you have? Category A, B, C, E and/or H. Where you have more than one firearm, select the highest calibre.

Operational video surveillance systems (*r.268 Firearms Regulations 2024*)

Must meet **or** exceed the following:

- The video cameras included in the surveillance system have a frame rate of 12.5 frames per second;
- The surveillance system displays the date and time the video is taken on the video, but not so that the date and time cover a firearm repository or the entrance points to the storage place;
- The surveillance system is connected to an uninterruptible power supply;
- If the surveillance system ceases to take or record video, at least one (1) person who stores firearms at the place where the system takes video is notified;
- Access to the surveillance system, and the recorded video, is protected by a password;
- The surveillance system is accessible remotely by at least one (1) person who stores firearms at the place when the system takes video;
- The surveillance system keeps a record of each time the system is accessed;
- The surveillance system retains the recorded video for at least the period of 30 days beginning on the day on which the video is recorded;
- The surveillance system can export uncompressed images from video, or export the video in its native formation, while the system still takes and records video;
- The surveillance system can take video that captures a person's face consistently with the recommendations of AS4806.2:2006 in relation to facial recognition;
- The surveillance system otherwise substantially complies with the recommendations, requirements or other provisions that apply to video surveillance systems under AS4806:2006;
- An operational video surveillance system must record video in the entirety of the storage place, the areas outside the storage place from which the place can be accessed and includes multiple video cameras so that more than one (1) camera records video in the same area.

1.) How many firearms do you have?

2.) Is your storage location occupied or unoccupied?

3.) What categories of firearms do you have?

Category	< = 5		6 - 15		16 +	
	Occupied	Unoccupied	Occupied	Unoccupied	Occupied	Unoccupied
