Clean Energy Future Fund round 1 - Addendum to application documents

IMPORTANT

By submitting an application, an applicant will be deemed to have reviewed and understood this Addendum.

Addendum advice

Clarification of Project Eligibility Criteria (Section 3.3.2 of the applicant guidelines)
Some of the criteria described as eligibility criteria in the applicant guidelines are to be assessed as part of the merit assessment and will not result in a project being considered ineligible. Clarification of each criterion is provided below.

Criterion	Assessment of criterion
Project Eligibility Criterion 1: Prescribed funding limits	The maximum funding level available for individual projects is $2 million. Applications requesting more than $2 million will be considered on merit and will not be excluded on this basis; however. government may offer less funding than the amount sought by an applicant and may attach conditions or requirements to any funding offer.
Project Eligibility Criterion 3: Rights and approvals	The ability of an applicant to secure the required regulatory approvals will inform assessment of a project's overall merit against merit criteria (*Organisational capacity and risk management*).
Project Eligibility Criterion 3: Rights and approvals (insurance cover)	The ability of an applicant to secure adequate insurances will inform assessment of a project's overall merit against merit criteria (*Organisational capacity and risk management*).
Project Eligibility Criterion 4: Other	Where an activity is required by law, this will inform assessment of a project's overall merit against merit criteria (*Not common practice*).
Project Eligibility Criterion 5: Project status	Where the activity has already commenced, this will inform assessment of a project's overall merit against merit criteria (*Business case*).
