Building and Energy Western Australia

State-wide Cladding Audit

Status update for publicly owned buildings as at 31/03/2026

Cladding Audit heat map

Summary of Audits

The Department of Local Government, Industry Regulation and Safety (LGIRS) contacted all government departments and agencies (agencies) regarding the risk presented by combustible cladding and requested that they undertake audits of their respective portfolios.

LGIRS requested that agencies adopt the following as a minimum audit scope:

- all buildings constructed or refurbished after 2000;
- that are three storeys or taller;
- with cladding attached or incorporated; and
- that fall within BCA classes 2, 3, 4 and 9.

Several agencies have used more robust scopes than the minimum proposed by LGIRS as an extra precaution.

This summary report has been updated and published on a regular basis since 2018.

A final annual update will be provided in March 2027. All agencies should be contracted directly for any outstanding updates after March 2027.

Agency Reporting

All agencies have undertaken detailed fire engineering risk assessments for buildings that have not been cleared during the initial review. Requests for information about these should be referred to the individual government department responsible for the building.

Notes

1. All agencies with buildings within their audit scope have engaged fire engineers to carry out a detailed risk assessment of the cladding. All reasonable measures to mitigate the risk of fire spread pending remediation have been implemented.

Status update on publicly owned buildings as at 31/03/2026

Publicly owned buildings*	Number of buildings within scope reviewed by agency	Number of buildings cleared after initial review	Number of detailed risk assessments commenced	Number of buildings cleared after detailed risk assessment	Number of buildings requiring remedial action	Remedial works in progress	Remedial action complete
