

Cigarette butts can cause fires

Please dispose of your cigarette butt responsibly

Flicking your cigarette butt from a vehicle can result in a \$200 fine. Lit cigarette butts can result in a fine of \$500.

Reporting litterers

Litter is any material that is disposed of on the ground incorrectly. It includes cigarette butts, drink containers, food and food packaging thrown from a car window or items fallen from an unsecured load. Any litter disposed of inappropriately is illegal under the *Litter Act 1979*.

You can help to reduce litter by becoming a Keep Australia Beautiful Council registered Litter Reporter and reporting offences to Keep Australia Beautiful Council. To register visit www.kabc.wa.gov.au.

Dear traveller

This Outback Pack is provided by Keep Australia Beautiful Council and proudly supported by Main Roads WA.

Since 2009, over 119,000 Outback Packs have been distributed around Western Australia.

Outback Packs enable you to ensure there is less litter on our roadsides meaning less damage to our environment and less harm to our wildlife.

Use your pack to:

- Manage your own litter
- Clean up other people's mess
- Reduce roadside litter
- Tidy rest stops and camping areas

When you have filled your bags:

- Place litter in an onsite bin
- If there is no bin, deposit it in the next bin

You can't flush in the bush!

Used toilet paper is a health hazard and is extremely unsightly.

If you need to go:

- **go** to <https://toiletmap.gov.au> to find a toilet near you
- **go** 100m from any waterway, camp site or roadside rest stop
- **go** dig a hole at least 15cm deep and bury all waste and paper
- **go** with a bag for sanitary items (as they don't break down easily)
- **go** to <http://www.dumpppoints.com> to find a place for your caravan to go too

Keep the scene clean!

Stop roadside littering

Roadsides are the most littered areas in Western Australia. Roadside litter has to stop and you can help.

What can you do?

- Bin it!
- No bin? Take your rubbish with you until you find one, then bin it!

Why is it a problem?

- Litter is harmful to the environment and wildlife
- Discarded cigarette butts are a major fire hazard
- Cleaning up litter in Western Australia costs more than \$6 million a year

Thank you for helping to Keep Australia beautiful.
