Reasons for which this notice is issued:

This **Notice** is given to the **Occupier** being **Cockburn Cement Limited** under section 73A(1)(b) of the *Environmental Protection Act 1986* (WA) (the **Act**) because I have reasonable grounds to suspect a condition of pollution is likely to arise or has arisen.

The nature of the suspected pollution is:

I have reason to believe that a condition of pollution has arisen, or is likely to arise, through the direct or indirect alteration of the environment to the detriment of an environmental value, namely a beneficial use, that involves an emission. This is due to the emission of unreasonable odour into the atmosphere from **kiln stacks 5 and 6** at the **premises**,

caused by waste gases released during the heating of shell sand in the lime manufacturing process.

Therefore, this notice has been given to require the **Occupier** to take measures to prevent, control and abate the condition of pollution.

I am satisfied that because **Cockburn Cement Limited** is the **Occupier** of the **Premises** from which the odour emissions have emanated and the **Occupier** upon whom the requirements of **Licence L4533/1967/15** issued on 6 December 2021 are binding, you are the appropriate person to whom to give this **Notice**.
