Company description

Geo Oceans is a specialist provider of ROV inspection services and has developed asset deployed OBS-ROV technology to provide clients with reliable, safe and cost-effective alternatives to traditional manned inspection, commercial diving or work-class ROV inspection services. Our ROVs are deployed directly over the side of operating assets or off vessels of opportunity, eliminating the need for dedicated ROV support vessels.

Capabilities

- Global Small ROVs and subsea robotics experts headquartered in Perth, WA
- Inspection, cleaning, advanced NDT, light intervention & marine science surveys
- Sovereign ROV, electronics and tooling design and development capability
- Vessels, jetties, tanks, platforms and subsea infrastructure inspections
- Development of advanced inspection technologies
- Remote inspection and operations
- Class accredited for ROV and robotic inspections of vessels

Discriminators

- One of the largest small ROV fleets globally with 40+ small ROVs
- Ability to deploy from any vessels or fixed structures globally
- Remote inspection capabilities
- Integration of advanced NDT and inspection technologies
- World first robotic cargo tank inspection capabilities
- Strategically located in Perth, Aberdeen and Houston
- Extensive Experience deploying robotics and personnel globally
- Approx 10% of company workforce are Defence Force veterans

Key Customers
