

Notice of cancellation under the Waste Avoidance and Resource Recovery Regulations 2019

Under Regulation 3Q, the Chief Executive Officer (CEO) of the Department of Water and Environmental Regulation has approved the cancellation of the container approval for the beverage product as listed in the table below.

Product Name	Product Barcode	Material Type	Container Lid Material Type
PLANET WATER 500ML NATURAL SPRING WATER	9333022029652	PET - Clear	Biodegradable, compostable material (polypropylene).

The grounds for the proposed action are that WA Return Recycle Renew Ltd (WARRRL) has provided advice for the cancellation of the beverage product as the container material type includes a biodegradable additive that constitutes a recycling contaminant for PET.

WARRRL has advised that the presence of the additives contaminates PET recycling processes, and consequently the container approval should be cancelled.

The cancellation takes effect on Friday 28 July 2023.
