

Round 2 Approved List of Software and Hardware (EV Chargers)

This is a consolidated list comprising:

- 1. Approved software list
- 2. Approved AC charger list
- 3. Approved DC charger list

Refer to the interactive data list for additional data fields on each AC and DC charger (including number of ports and procurement lead time) and to view the data using excel filters.

Disclaimer

The information contained in this list is based on information and assertions provided to the Electric Vehicle Council and Energy Policy WA by the equipment and software suppliers. The State of Western Australia is not responsible for any losses associated with the use of the information presented on this list. It is the responsibility of anyone using this list to conduct their own research and due diligence on each supplier and EV charging hardware/software prior to purchase or installation.

1. APPROVED SOFTWARE LIST

Criteria

All approved EV charger software has been assessed and approved against the following criteria: Enable the remote management of EVSE

- Be available and supported within Australia
- Be compatible with OCPP 1.6
- Have a user friendly interface
- Have a mapping interface to locate EV chargers
- Enable any member of the public to sign up
- Be available on Android and iOS operating systems
- Offer billing services that enable differential pricing (for example, different prices at different times of day)
- Be supported by evidence, from Plugshare or similar, of the software platform enabling charging at 3-4 different locations

How to use the software list

In order to receive a grant you must take out a two year subscription to one of the EV charging software platforms on the Approved Software List. Listed below are the approved software platforms and their approved software supplier. You must get your software platform from an approved software supplier - this means that the quote provided for software in your application should be on the letterhead of an approved software supplier. An electrical contractor can provide turnkey services but their quote to the grant applicant must be supported by a separate quote from an approved software supplier.

The list is arranged by alphabetical order, by name of the approved software supplier. The approved supplier is listed first as this is who you need to discuss and supply the software. The approved software options vary widely in look, feel and capabilities. We encourage you to speak to the software suppliers in this list to learn more.

The final column shows the brands of approved EV chargers that each software supplier can support. However, please note that software platforms do not necessarily support all approved EV chargers from a specific brand. You must ensure that the EV charger(s) you select from the approved EV charger list can be supported by your selected software. Your software supplier will be able to assist you with this.

Software suppliers may also be able to provide pricing for some of the EV chargers on the approved EV charger list. All offer turnkey installation services (though in some instances they will coordinate the installation process via sub-contracted electricians). However there is no requirement to purchase EV chargers and installation through them, only the software.

The pricing shown in this list has been provided by each EV charger software supplier. The Charge Up Workplace Grants (Round 2) will contribute 50% towards the cost of a 2-year subscription, based on the prices shown in this list. Please note: only the 2-year upfront cost is eligible for co-funding. Any variable fees agreed to beyond this are to be met at applicant's own expense. Grants applicants should consider any terms and conditions stipulated by each software provider.

List of approved software platforms and their approved supplier

Note: all suppliers can provide turnkey services

Software supplier	Software price (ex-GST) Only the 2-year upfront cost is eligible for co-funding	Variable costs (not covered by grant)	Brand of EV chargers that work with the software*
Casacharge	Fixed cost for 1 year: \$150 per charge port for paid charging \$100 per charge port for free charging	None	Schneider Electric, Ocular, EVBox, KarChargers, ABB, Delta Electronics, Teltonika, Smappee, and Circontrol.
Chargebay	Fixed cost for 1 year: \$200 per charge port Two-year subscription cost: \$400 per charge port If required, \$108 per annum for an IOT sim card		
Charge Hub	Fixed cost for 1 year: Public = \$280 per charge port Semi Public = \$180 per charge port	There are only ongoing data costs if a separate SIM card is required for a connection. An approximate cost is \$9 + GST per month each.	• • • • • • • • • • • • • • • • • • • •
Charge N Go	Fixed cost for 1 year: \$275 per charge port for public charging \$225 per charge port for private charging	\$0.05 per kWh for management services 4G Data Package: \$50 per 500MB when 4G data is required	ABB, Circontrol, Delta Electronics, EVBox, Kempower, Landis+Gyr, Liteon, Ocular, Smappee, Schneider Electric, Siemens, Sinexcel, Tritium, Zappi

Chargestar Pty Ltd	Wevolt	Fixed cost for 1 year: \$150 per charge port for paid charging \$100 per charge port for free charging Fixed cost for 2 years: Private Plan 1: \$360/ charger/ 2 years	Applies to Public	Casacharge: ABB, Circontol, Delta Electronics, EVBox, Ocular, Schneider Electric, Smappee Wevolt: ABB, Autel, Circontrol, Delta, Ocular,
		Private Plan 2: \$2400/ site/ 2 years Public Plan 1: \$600/charger/ 2 years Public Plan 2: \$2400/charger/2 years	- Transactions \$10 and under attract a \$1 fee per charging session Transactions over 10 attract a fee of 10% of the total cost of the charging session	Sinexcel, Schneider, Teltonika, Electric, Wallbox
Chargetech		Public subscription (4G data):\$390.00 per annum per charge port. Public subscription (base building internet): \$330.00 per annum per charge port. Private (non-public facing) subscription (4G data): \$225.00 per annum per charge port. Private (non-public facing) subscription (base building internet): \$165.00 per annum per charge port.	A 5% transaction fee is applied to all driver revenue accrued where a charger has a tariff applied	Chargefox: ABB, Circontrol, EVBox, Ocular, Schneider Electric, and Smappee
		Fixed cost for 2 years: Private Plan 1: \$360/ charger/ 2 years Private Plan 2: \$2400/ site/ 2 years Public Plan 1: \$600/charger/ 2 years Public Plan 2: \$2400/charger/2 years	Applies to Public Plan 1 only: - Transactions \$10 and under attract a \$1 fee per charging session Transactions over 10 attract a fee of 10% of the total cost of the charging session	Wevolt: Smappee, Fronius, Autel, Blueberry, ABB, Ocular, Sinexcel, Schneider Electric, Wallbox, Tritium, Kempower, Teltonika, Jetcharge, and EO
ConnectSource		Fixed cost for 1 year: Lite: \$152 per port Pro: \$306 per port	Transaction fee for mobile payment 1.75% + \$0.30 of the value of each transaction	ABB, Circontrol, Delta, Garo, Schneider Electric, Siemens
		Fixed cost for 1 year: \$200 per charge port Two-year subscription cost: \$400 per charge port If required, \$108 per annum for an IOT sim card

Private (non-public facing) subscription (4G data): \$225.00 per annum per charge port. Private (non-public facing) subscription (base building internet): \$165.00 per annum per charge port.	A 5% transaction fee is applied to all driver revenue accrued where a charger has a tariff applied	Smappee

	Fixed cost for 1 year: \$275 per charge port for public charging \$225 per charge port for private charging	\$0.05 per kWh for management services 4G Data Package: \$50 per 500MB when 4G data is required	Smappee
Wevolt	Fixed cost for 2 years: Private Plan 1: \$360/ charger/ 2 years Private Plan 2: \$2400/ site/ 2 years Public Plan 1: \$600/charger/ 2 years Public Plan 2: \$2400/charger/2 years	Transactions \$10 and under attract a \$1 fee per charging session. Transactions over 10 attract a fee of	Quench, Autel, Tritium, Kempower, Circontrol, Magellan, Sinexcel, ABB, Schneider, Scame, Ocular, Smappee, Teltonika, Wallbox, Fronius, Garo, EO, Blueberry, Evos, Jet Charge, Appcharge, and Delta Electronics

^{*} This is a point-in-time guide only and applicants should always check with their software supplier that their chosen software works with their chosen hardware:

- i) Software platforms do not necessarily support all of the approved models from that brand
- ii) The brands of approved hardware that work with the approved software will evolve over time. This means some hardware brands *not* listed against a software platform, may in fact work with one of the approved software platforms. However you should get confirmation from the software supplier that this works.

2. APPROVED AC CHARGER LIST

Criteria

All approved AC chargers have been assessed and approved against the following criteria:

- Available within Australia, with a procurement lead time of no more than 3 months
- Compliant to relevant Australian standards
- Be RCM marked, in accordance with AS/NZS4417
- Able to support charging of any EV make/model available in Australia (Note, it is acceptable for the EVSE to have automotive OEM branding, provided the charger can support all vehicles)
- Type 2 socket outlet or Type 2 tethered cable
- 7kW to 22kW AC output
- OCPP 1.6 and/or OCPP 2.0 communications capability, over at least one of Ethernet, Wifi or 4G
- Ingress protection rating of IP54 or higher
- Have an impact protection rating of IK08 or higher

EV charger and software compatibility

In order to receive a grant you must take out a two year subscription to one of the EV charging software platforms on the Approved Software List. Please ensure that you check with your software provider that your preferred make and model of EV charger is compatible with the software you have selected. Obtaining written confirmation from your software supplier is recommended.

List of approved AC chargers

Charger Brand	Charger Model number	Charger description	Outpu t (kW)	Charger Mounting type

3. APPROVED DC CHARGER LIST

Criteria

All approved DC chargers have been assessed and approved against the following criteria:

- Available within Australia, with a procurement lead time of no more than 9 months
- Compliant to relevant Australian standards
- Be RCM marked, in accordance with AS/NZS4417
- Be able to support any EV make/model Available in Australia that has a CCS2 DC port
- Have at least 1 x CCS2 cable outlet. CHAdeMO is permitted, but not required. Multiple cable outlets are permitted but not required
- Have DC output of 24-350kW
- OCPP 1.6 and/or OCPP 2.0 communications capability, over at least one of Ethernet, Wifi or 4G
- · Ingress protection rating of IP54 or higher
- Have an impact protection rating of IK10 or higher
- Offer a service level agreement (SLA) or equivalent instrument on all quotations. The SLA shall define, but not limited
 to, committed timeframes to supply replacement parts in case of breakdown, and commercial consequences for
 failure to supply

EV charger and software compatibility

In order to receive a grant you must take out a two year subscription to one of the EV charging software platforms on the Approved Software List. Please ensure that you check with your software provider that your preferred make and model of EV charger is compatible with the software you have selected. Obtaining written confirmation from your software supplier is recommended.

List of approved DC charger components

Charger Brand and component type	Model number	Description	Output (kW)	Charger Mounting type
Kempower: Power Cabinet	C501D4V3	C501D4V3 Kempower Cabinet without power modules. DC output 150Vdc - 1000Vdc, 4 DC outputs. 200 kW maximum capacity.	Up to 200kW	Pedestal
Kempower: Power Cabinet	C502D4V3	C502D4V3 Kempower Cabinet without power modules. DC output 150Vdc - 1000Vdc, 4 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C503D4V3	C503D4V3 Kempower Cabinet without power modules. DC output 150Vdc - 1000Vdc, 4 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C502D6V3	C502D6V3 Kempower Cabinet without power modules. DC output 150Vdc - 1000Vdc, 6 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C503D6V3	C503D6V3 Kempower Cabinet without power modules. DC output 150Vdc - 1000Vdc, 6 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C801D4V3	C801D4V3 Kempower Cabinet without power modules. DC output 200Vdc - 920Vdc, 4 DC outputs. 200 kW maximum capacity.	Up to 200kW	Pedestal
Kempower: Power Cabinet	C802D4V3	C802D4V3 Kempower Cabinet without power modules. DC output 200Vdc - 920Vdc, 4 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C803D4V3	C803D4V3 Kempower Cabinet without power modules. DC output 200Vdc - 920Vdc, 4 DC outputs. 350 kW maximum capacity.	Up to350kW	Pedestal
Kempower: Power Cabinet	C801D8V3	C801D8V3 Kempower Cabinet without power modules. DC output 200Vdc - 920Vdc, 8 DC outputs. 200 kW maximum capacity.	Up to 200kW	Pedestal
Kempower: Power Cabinet	C802D8V3	C802D8V3 Kempower Cabinet without power modules. DC output 200Vdc - 920Vdc, 8 DC	Up to350kW	Pedestal
