Whole of sector Outcomes Measurement Framework

Project update to SCF: June 2019

Kylie Hansen, Senior Consultant, WACOSS

Election commitment

- Deliver an agreed-upon framework to measure outcomes across the community services sector;
- Ensure the framework gives government a clear picture of the effectiveness of its funding, leading to improved funding decisions;
- Ensure the framework assists
 organisations in providing more targeted,
 flexible and innovative services, and new
 opportunities to collaborate.

Engagement

- 105 total opportunities to socialise the Framework and receive feedback
- 987 people reached through these opportunities
- **7 focussed workshop consultations**, including 2 x regional opportunities
- 11/15 DLGs briefed
- More than 20 Frameworks shared with us to 'map in' and draw from
- **70+ pages** of collated feedback
- Connection with local government (e.g. CoP Social Strategy)
- Positive links: adopted by orgs; Depts working to it; Our Communities; Index of Wellbeing

Awareness of State Government Policy and Suggested Steps Forward for the Community Sector.

Outcomes Measurement Framework WA Prototype 5: The Framework is a hierarchy of outcomes and associated indicators, providing the architecture for a whole-of-government and a whole-of-sector June 2019

The Framework is a hierarchy of outcomes and associated indicators, providing the architecture for a whole-of-government and a whole-of-sector approach to service delivery across agencies and organisations. The intent of the Framework is to orient our focus to the **outcome**, rather than the output; and to the **person**, rather than to the program.

Domains and outcome statements:

Safe

We are safe and free from harm

Stable

We are financially secure and have suitable, stable and culturally appropriate housing

Healthy

We are healthy and well

Equipped

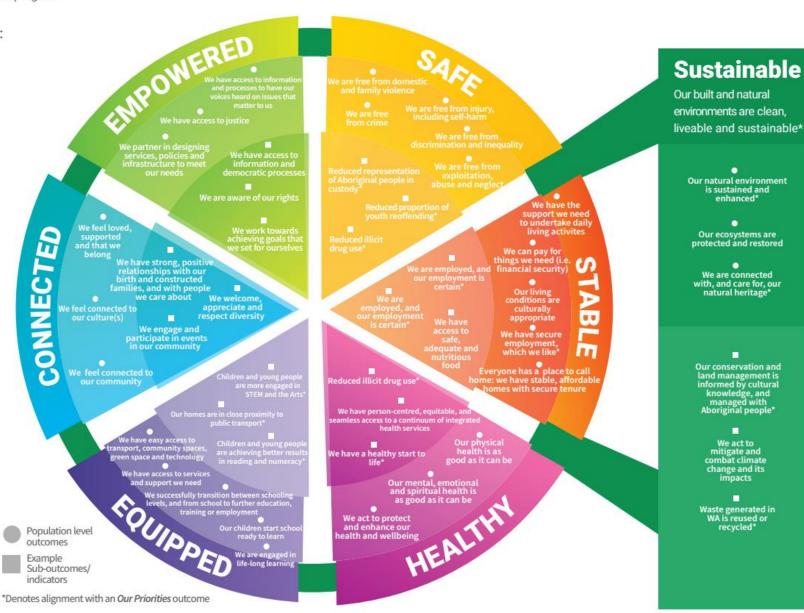

We have the skills, experiences and resources to contribute to our community and economy

Connected

We are connected to culture, our communities, our environment, and to each other

Empowered

We choose how to live our lives

Outcomes Measurement Framework

Worked Example

Mapping contract outcomes and indicators against proposed population-level framework

		proposed population-level framework	
outcome statements:	Stable We have suitable and stable homes and are financially secure	Safe We are safe and free from harm	Connected We have strong relationships and are connected to culture and community
Population outcomes:	- We have stable homes with secure tenure - We have approppriate living conditions - We have financial security	- We are free from domestic violence - We are free from abuse and neglect - We are free from crime - We are free from injury, including self-harm	- We have strong personal relationships - We are part of strong, functioning families - We participate in our communities - We feel connected to culture
Population indicators:	- Eg, decrease in homeless population	- Decrease in rate of domestic and family violence	- Increase in rate of participation in community activities
		Family Support Network Lead Agency contract	
System-level outcomes:	- FSN's provide secondary family support to improve outcomes for vulnerable children and prevent the need for tertiary interventon	- FSN's provide secondary family support to improve outcomes for vulnerable children and prevent the need for tertiary interventon	- FSN's providesecondary family support to improve outcomes for vulnerable children and prevent the need for tertiary intervention
-level ndicators:	Families improve parenting skills to safely care for their children at home	Families improve parenting skills to safely care for their children at home	Families improve and develop culturally safe support networks
Program-level outcomes & indicators:	Number and percentage of families with a closed case plan exiting the service by Aboriginal family status who reported confidence to maintain stable family environment	Number and percentage of families with a closed case plan exiting the service by Aboriginal family status who reported increased ability to keep children at home safely	Number and percentage of families with a closed case plan by Aboriginal family status who report they have increased their culturally safe support networks at cas closure

Recommendations for Implementation

- Compelling vision for implementation from Working Group
- Consistent, agreed-upon approach to outcomes for human services across sectors and departments
- This phase → first step towards whole of government framework to underpin State Government approach to outcomes-based policy and procurement
 - E.g. Sustainable, Healthy and domains alongside incorporation of elements of OBM
- Indefinitely iterative
- Leverage current priorities and policy
- Outcomes Based Management

Next steps (to achieve priority as outlined in SCP)

- Second phase of development of the OMFW requires:
 - Information/input from implementation instances
 - Improved usability and functionality
 - Ongoing consultation and engagement, specifically re: outcomes for Aboriginal peoples
- Agreement on appropriate authorising environment
 - Above development may need to occur before official government processes
- Implementation will provide service-level outcomes that can be mapped to population level outcomes
- Long-term resourcing, capacity-building across sectors and ownership (recommendation with a central agency)

Immediate next steps

It is recommended that the SCF:

- 1. Provide in-principle endorsement of the Framework
- Brief Minister McGurk about the Framework and possible next steps
- 3. SCF DGs promote the use and testing of the OMFW within their Departments
