

State Underground Power Program Summary of Round Six Evaluation Scores and Survey Results

The below table shows the total evaluation score for each project proposal and the evaluation score for each of the three selection criteria.

The table also shows the level of community support for each proposal as measured by the response to Question 2 in the community survey that asked whether property owners supported paying an estimated amount to get underground power.

The Sample obtained in all proposal areas exceeds the minimum number required to meet the statistical standard (ie 95% Level of Confidence & +/- 5% Sampling Confidence Interval) for the given Population in each proposal area.

Therefore, generalisations from the Sample to the Population can be made with confidence.

In accordance with the funding round guidelines, community support surveys were conducted for only the highest ranked proposals from the Stage 1 evaluation.

Some project proposals are not listed because they did not meet mandatory submission requirements and therefore did not receive evaluation scores.

Local Government	Proposal name	Stage 1		Stage 2			Final Score Proposal score
		Network Priority Criterion Points allocated	Funding Offer Criterion Points allocated	Community Support Criterion Points allocated	Community Support Level %	Survey Response Rate %
