

Email Submission from: Juliette Pearce Tucker

Date: 22 January 2020

---

1. Closer to communities in my opinion should stop the minority decision making and put majority for fairness on matters of importance policies.
2. Preventative Initiatives once again should in my opinion have an understanding what long-term issues are continuously ongoing & search for solutions to prevent escalation so that it suits the environment.
3. Putting Culture at the centre first should be in my view be of of high quality sustainability, some established Aboriginal Corporations are too busy managing developed current good governance/compliance's Acts & policy designs and some are not always suited to the fit within this area.
4. Building Cultural understanding and respect in my opinion are failing from Native Title Determinations where lack of Respect is no longer maintained and there are too many loose ends that have no placed tighter controls & mechanisms, policies in Rulings needs greater accountability for reassurances for all Generations.

Sender is Ms Juliette Pearce Tucker an Indigenous woman a resident of town NEWMAN WA 6753.
