About us

DSC-IT is a privately owned, local WA company, formed in 1997. At DSC-IT, we have been providing Fixed Price Managed ICT Services for almost two decades. DSC-IT specialises in Architecture, Managed Services, and Infrastructure implementation. Our consultants are highly experienced ICT professionals trained with the latest certifications and industry knowledge.

As the IT partner you can rely on, we design and implement solutions that help your organisation achieve productivity and growth. We are your technology partner, never just your provider. That's the DSC-IT difference. We understand that the success of your organisation is critical. That's why we work to optimise that success. Other companies begin with a technical solution and work backwards, trying to sell you on features that may or may not align with your business needs. Not us. Our solutions are defined and developed by starting with your business needs. Now that's a true partnership!
