About us

Hexagon provides specialised software development services for Emergency Services, Utilities and Government departments. The services range from specialised GIS services to interface development and deployment of emergency services software. Hexagon has extensive experience in GIS, Computer Aided Dispatch, Safe City software including integration of systems of record to create a common operating picture.

Hexagon's Geospatial division also supplies expertise in image processing (eg from satellite, manned aircraft or UAV) and photogrammetry and the distribution of image and 3D data products at high volume and velocity for smart digital reality applications (eg digital twins).

Skills, experience and services

Extensive ICT services for project design, development, implementation, management and on-going software maintenance and support delivered from our Australian offices. Specialist skills in GIS, Image Processing (including Artificial Intelligence and Machine Learning), Real-time Digital Twins, Web Development, Integration, Computer Aided Dispatch and Mobile apps.
