Address:	PO Box 861 CLOVERDALE WA 6985
Date submitted:	29 October 2007

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports this Rule Change proposal.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports Synergy's contention that Intermittent Generators (IGs) do not have the same control over their output as Scheduled Generators and that the Market Rules that do not recognise this increase the risk profile of developing an IG and can create a barrier to entry. The removal of the requirement to submit Resource Plans will avoid unnecessary obligations and promote the use of renewable energy technologies.

LGP also supports Synergy's contention that the removal of the Resource Plan Deviation Quantity from the balancing settlement quantities will remove confusion about generating to Net Contract Positions, thereby improving market efficiencies.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.

LGP supports acceptance of the Rule Change as proposed.
