#### Submission

---

---

**1. Please provide your views on the proposal, including any objections or suggested revisions**

LGP supports the proposed Rule Change on the grounds that it seeks to improve the capacity certification process without material impact on applicants for certification. LGP is satisfied with the proposal as it stands but requests that the IMO double-check proposed revision 10.22.1 (g) i) to ensure that only **the relevant** Rule Participant has access to the confidential information.

---

**2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives**

LGP supports the IMO's contention that the Rule Change would promote the reliable production and supply of electricity and electricity related services in the SWIS by enhancing the reliability of the Reserve Capacity Mechanism.

---

**3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved**

LGP would incur no organisational costs as a consequence of adopting the change.

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed**

LGP would be able to implement this Rule Change immediately.

---
