Submission

1. Please provide your views on the proposal, including any objections or suggested revisions.

Griffin supports this rule change proposal as a sensible measure for promoting a level of transparency that does not compromise participant confidentiality and which enhances competition and efficient investment in the market

2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.

Griffin suggests the impacts of RC_2009_17 on the Market Objectives will be:

- (a) A more transparent market will encourage more efficient investment by generation (and DSM) proponents, leading to greater efficiency in the supply of electricity
- (b) A more transparent market will similarly allow a greater number of potential generation investors to enter the market, thus encouraging competition among generators
- (c) A more transparent market will better allow competing generation technologies and options to find appropriate positions within the sector, thus lessening any discrimination against these options that may have existed due to a lack of transparency

- (d) The rule change proposal appears consistent with this objective
 - (e) The rule change proposal appears consistent with this objective
-

3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

No organisational changes required to implement this rule change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.

Not applicable.
