---

**1. Please provide your views on the proposal, including any objections or suggested revisions.**

Synergy has for a long time been concerned with the low level of capacity crediting transparency in the WEM and so supports this rule change proposal. The only restriction Synergy would suggest is a practical consideration related to Curtailable Loads.

Unlike generators the list of Curtailable loads may change considerable between registering the capacity commitment and supply during the capacity year. Synergy suggests that for Curtailable loads a single value be published per registration.

---

---

**2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.**

---

---

**3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.**

No cost.

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.**

Zero time.
