### Submission

---

---

#### 1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change on the grounds that it increases the ability of parties to organize Opportunistic Maintenance, thereby minimizing unnecessary disruption to generation without affecting system integrity.

---

#### 2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports System Management's contention that this proposed Rule Change furthers Market Objectives (a) and (d), promote the economically efficient, safe and reliable production and supply of electricity and minimising the long term cost of electricity.

---

**3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved**

LGP would incur no organisational costs as a consequence of adopting the change.

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed**

LGP would be able to implement this Rule Change immediately.

---
