Date submitted:	29 June 2010

Submission

1. Please provide your views on the proposal, including any objections or suggested revisions

LGP supports the Rule Change on the grounds that it corrects a manifest error; in the event of a system failure, the closing of the Bilateral Submission Window should be extended in a similar manner to that of the STEM and Resource Plan Submissions.

2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives

LGP supports Verve Energy's contention that the rule change supports Market Objective a) through more efficient pricing. In particular, we note that the momentum of the market evolution process is towards gate closure as late as possible to facilitate improved forecasting and knowledge of fuel allocations.

3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved

LGP would incur no organisational costs as a consequence of adopting the change.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed

LGP would be able to implement this Rule Change immediately.
