

NOTICE OF PUBLIC WORKSHOP: RELEVANT DEMAND METHODOLOGY

The IMO wishes to inform interested stakeholders of its intention to hold a public workshop to discuss the alternative Relevant Demand calculation methodologies which have been identified for measuring the performance of Curtailable Loads and Demand Side Programmes. In particular, the workshop will discuss the options of utilising a:

- revised static baseline methodology (based on 12 IRCR Trading Intervals), as proposed by the IMO under the Rule Change Proposal: Curtailable Loads and Demand Side Programmes (RC_2010_29); or
- dynamic baseline methodology, as presented by EnerNOC in the Pre Rule Change Discussion Paper at MAC meeting No. 35: Methodology for Relevant Demand Calculation (PRC_2011_01).

The relevant documentation for this workshop is available on http://www.imowa.com.au/RC_2010_29.

The details of the public workshop are as follows:

Date: Friday 8 April 2011

Time: 2.00pm – 4.00pm

Location: IMO Board Room

If you would like to register for the workshop, please email your name, contact details and details of any specific issues you wish to discuss at the workshop to market.development@imowa.com.au by 12:00pm, Monday 4 April 2011.

Note that a draft agenda for the workshop, including a list of discussion points, will be provided to all interested attendees prior to the workshop and copies made available here: http://www.imowa.com.au/RC_2010_29.
