Rule Change Extension Notice Transparency of Outage Information (RC_2012_11)

This notice of extension is given under clause 2.5.12 of the Market Rules.

Submitter: Suzanne Frame, IMO

Date originally submitted: 30 July 2012

Date of extension: 4 December 2012

Reasons for the Extension

In accordance with clause 2.5.10 of the Market Rules, the IMO has extended the timeframe for publishing the Final Rule Change Report for the Rule Change Proposal titled Transparency of Outage Information (RC_2012_11).

The publication date for the Final Rule Change Report is extended until **Friday, 22 March 2013**.

The IMO notes the costs, complexities and time frames that System Management articulated in its out of session submission dated 7 November 2012, to implement RC_2012_11 as proposed in the Draft Rule Change Report. The IMO is exploring alternative options with System Management to identify a way of achieving outage transparency within a reasonable time frame and budget.

Depending on the outcome of discussions with System Management the IMO may consider it appropriate to publish details of further proposed changes to the Amending Rules for RC_2012_11 and conduct a period of further consultation to allow interested parties an opportunity to make submissions on the revised proposal.

For further details relating to the Rule Change Proposal please refer to the Market Web Site.

Proposed Work Programme

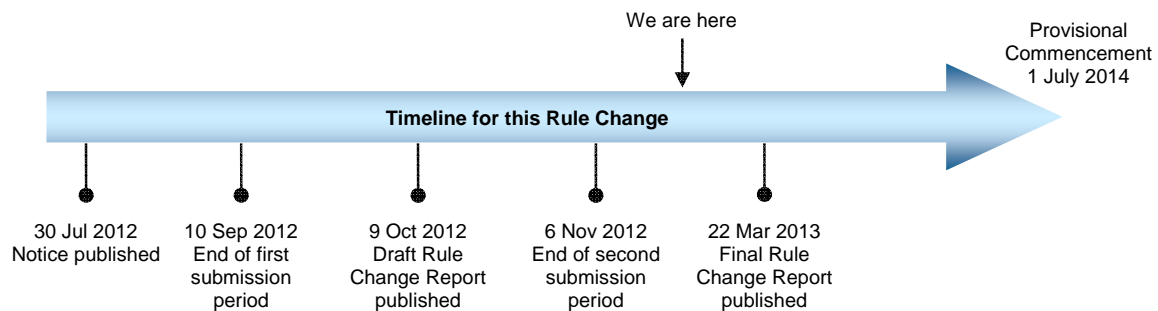

- The IMO completes its consultation with System Management.
- If appropriate, the IMO publishes details of further proposed changes to the Amending Rules and conducts a period of further consultation
- The IMO presents its final decision in the Final Rule Change Report.
