### Submission

---

**1. Please provide your views on the proposal, including any objections or suggested revisions**

Community Electricity supports the Rule Change Proposal on the grounds that it corrects a manifest error that otherwise permits multiple Generation Facilities sharing a network connection to received Capacity Certifications that in combination exceed the DSOC of the network connection.

---

**2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives**

Community considers that the Rule Change supports Market Objective a) [reliability] and is otherwise consistent with all the Market Objectives. More generally, the change is necessary to preserve the integrity of the Market Rules.

---

**3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved**

The proposal has no implications for Community.

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed**
