**Submission**

---

---

**1. Please provide your views on the proposal, including any objections or suggested revisions.**

Tesla Corporation supports the Rule Change Proposal on the grounds that it removes an unnecessary obligation on Market Participants without any increase in System risk. Safe equipment and operating procedures exist that make the additional notification requirement obsolete for distribution connected generators.

---

---

**2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.**

Tesla considers that the Rule Change will improve achievement of Market Objective (b) as it represents a reduction in process complexity and therefore will reduce barriers to entry.

Tesla considers that Market Objective (c) will be improved as the class of distribution connected generators will no longer be required to make unnecessary notifications.

The Rule Change is consistent with the other objectives.

- 
- 3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.**

The Rule Change will result in a reduction in process overhead when committing and de-committing to generation.

- 
- 4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.**

Tesla will not require any time to implement the process change as a result of the proposed Rule Change.
