Email: market.development@imowa.com.au

1. Please provide your views on the proposal, including any objections or suggested revisions.

System Management supports the intent of RC_2012_25, which provides discretion to the IMO to adjust a Market Participant's Settlement Statement where non compliance with a Dispatch Instruction occurs.

This adjustment would only occur to prevent compensation for being Constrained on or off being paid to a non-compliant participant.

The proposal is supported on the basis that it seeks to incentivise participants in a way that supports System Management's primary function, which is to maintain Power System Security and Reliability in the SWIS.

2. Please provide an assessment whether the change will better facilitate the achievement of the Market Objectives.

This proposal facilitates achievement of Market Objectives (a) and (d).

3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

System Management does not envisage any system changes will be necessary to implement this rule change proposal.

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.

System Management does not need to change its operations as a result of this rule change. On that basis, System Management supports the Independent Market Operator's intention to implement this rule change as soon as practicable.
