**1. Please provide your views on the proposal, including any objections or suggested revisions.**

*BEI supports the rule change as proposed by Alinta and agree with the Rule Change panel comment as copied below.*

*'that requiring estimates for all NCS intervals may be the most efficient way to address the manifest error. The Rule Change Panel considers that it may be perverse to exclude system normal intervals from the scope of the Rule Change Proposal if their inclusion is more efficient and has no material adverse impacts.'*

---

**2. Please provide an assessment whether the change will better facilitate the achievement of the Wholesale Market Objectives.**

*I believe that this will deter behaviour which would otherwise distort the market and better reflect the capacity credit mechanism intent.*

---

**3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems) and any**

**costs involved in implementing these changes.**

*No concerns.*

---

**4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.**

*We can work with AEMO but don't see this as onerous on our organisation*
