Dear DWER,

Re. Native Vegetation in Western Australia: issues paper for public consultation

I write to plead for conservation.
The value of our unique vegetation is well described.

I wish to support the four initiatives for improving vegetation management as proposed by the Urban Bushland Council WA Inc.

These are:

1. a State Native Vegetation Policy
2. better information about native vegetation
3. better regulation
4. a bioregional approach

I plead that there be no more loss of extent or condition of native vegetation.

Yours sincerely,
Chris
