

Get the facts on the vaccines

It's normal to have questions about new things. Find out what's true and what's not about COVID-19 vaccines. Together, we need to build vaccine confidence because each and every vaccinated person helps us move past the pandemic.

TRUTH

MYTH

The vaccines are safe

Many people around the world worked together to create COVID-19 vaccines, sharing money and scientists to get it done in just months, without missing any steps. Vaccines are only allowed in Australia after being tested and found to be safe and effective. All vaccines continue to be quality tested and monitored for safety.

COVID-19 vaccines do not contain live virus and cannot give you COVID-19

The vaccines pretend to be the real virus and teach your body how to defend itself. This will help stop you from getting really sick and going to hospital or even dying.

A microchip would not fit through the vaccine needle

This myth is based on a fake video circulating on social media.

COVID-19 vaccines were approved too quickly to be safe.

COVID-19 vaccines could give you COVID-19.

COVID-19 vaccines contain a microchip to track me.

TRUTH

MYTH

The vaccines are free for every person in WA

This includes temporary residents, refugees, migrants and people without valid visas.

We do know every ingredient that is in the vaccines

The vaccines are mostly water, with salt, sugar and fats. There is no graphene oxide, gluten, egg, wheat, bee venom, latex or animal products in the vaccines. The Australian Fatwa Council has endorsed the vaccines as Halal.

You can get a COVID-19 vaccine even if you don't have Medicare

You'll need to prove your identity at your appointment, so please bring a document with your name on it like a driver's licence, letter or bill.

Receiving a COVID-19 vaccine does not make you magnetic – anywhere on your body

COVID-19 vaccines do not contain any magnetic ingredients that could do this. You would need a lot of metal to attract a magnet. For example, people take multi vitamins which often contain iron. This doesn't make them magnetic because they are so diluted and spread through your body.

COVID-19 vaccines do not affect fertility

The vaccines do not affect your ability to have a baby now, or in the future. It is also strongly recommended that pregnant women get the COVID-19 vaccine to protect themselves and their baby.

It costs money to get a COVID-19 vaccine.

We don't know what's in these vaccines.

You need to have an active Medicare card to get a COVID-19 vaccine.

COVID-19 vaccines can make a magnet stick to your arm.

COVID-19 vaccines affect fertility.
