15. **Unit value**

(1) The sum of the entitlements to fish for mackerel that may be conferred by all the licences authorising fishing in an Area of the Fishery is equal to the capacity for that Area as determined in accordance with clause 12.

(2) The extent of the entitlement to fish in an Area of the Fishery arising from time to time from a unit (the unit value) shall be determined in accordance with Schedule 7 and be limited by reference to a number of kilograms (whole weight) of mackerel that may be taken.

(3) The holder of a licence, or a person acting on the licence holder’s behalf, must not fish in an Area of the Fishery unless the amount of mackerel (whole weight) as determined in accordance with clause 27 and taken from that Area of the Fishery under the authority of that licence during the period for which the licence has been granted or renewed is less than the amount determined by multiplying the unit value for each class of unit specified on a licence by the number of units of that class conferred by that licence.

(4) For the purposes of this plan any fillets on board, or landed ashore from, an authorised boat, and to which the skin and scales are not attached, shall be taken to be mackerel other than grey mackerel.

(5) Subclause (4) does not apply in respect of fillets other than mackerel -

   (c) 86 class 3A units, in respect of Area 3.

17. **Surrender of licence and reallocation of usual entitlement**

(1) Subject to subclauses (2) and (3), the CEO may increase the entitlement conferred by a licence -

(3) Subclause (1) applies only once in regard to the surrender of a licence.

18. **Grounds to refuse to transfer part of an entitlement**

The CEO may refuse to transfer any part of an entitlement under a licence on the grounds that -
   (a) the proposed transfer is not for a whole number of units; or
   (b) if the transfer were given effect the number of units conferred by a licence, disregarding any temporary transfer of units to or from the licence, would be less than one; or
   (c) the value of the current units of entitlement (in kilograms whole weight) for the relevant class of unit that would be conferred by the licence after the transfer would be less than the total quantity of mackerel (whole weight) relevant to that class of unit taken under the authority of the licence during the period for which the licence has been granted or renewed; or
   (d) the total fee has not been paid in respect of the licence from which the units are to be transferred.

19. **Temporary transfer of an entitlement**

The whole or part of an entitlement conferred by a licence may be temporarily transferred to another licence for a period ending at the time that the licence expires, provided that -
   (a) the value of the current units of entitlement (in kilograms whole weight) for the relevant class of unit that would be conferred by the licence after the transfer would not be less than the total quantity of mackerel (whole weight) relevant to that class of unit taken under the authority of the licence during the period for which the licence has been granted or renewed; and

SCHEDULE 7

Unit values

The extent of entitlement to fish in an Area of the Fishery that arises from a unit during a licensing period shall be determined using the following formula -

\[ A = \frac{C}{B} \]

Where -

A is the capacity of an Area of the Fishery (in respect of either mackerel other than grey mackerel, or grey mackerel, whichever applies to the relevant class of unit), as specified in clause 14;

B is the sum of all of the units of the relevant class of unit for the Area as specified on all the relevant licences immediately before the expiry of the relevant licensing period.

C is the value of the relevant class of unit (in kilograms).

Where, as a result of the above calculation a result is more than two decimal places, then the fraction ending with 50 or less at the 3rd and 4th decimal places is rounded down to two decimal places and any fraction ending with 51 or more at the 3rd and 4th decimal places is rounded up to two decimal places.

For the purpose of this schedule the “relevant class of unit” for the relevant species is set out in column 2 opposite the specified Area in column 1 of the Table to this Schedule.
