- 1.2** The appendix will operate for a period of twelve months from the date the appendix is inserted into this award. After the expiration of the twelve month period the new classification structure is to be inserted into the award, subject to a review of the new structure by the Australian Industrial Relations Commission. As part of this review the parties will ensure that the translation and transition process has been successfully implemented.
- 1.3** Where the new appendix has been introduced the award rates of pay prescribed in this appendix will replace those appearing in 10.1 of this award for the purpose of calculating the hourly rate of pay.
- 1.4** Parties to this appendix will implement it through consultative mechanisms appropriate to the size, structure and needs of the workplace and/or the company, firm or individual employer. Where it is agreed between the union and the employer such mechanisms may include the establishment of a consultative committee within the company comprising of equal numbers of employer representatives and agreed employee representatives. Such consultative committees will not be established within companies or firms employing less than fifteen employees. The nature and scope of the consultative mechanism to be established will be agreed to between the employer, the employees and the union.

**4.2** Upon translation to the new classification structure existing employees will be regarded as satisfying the requirements of the new skill level to which they translate. Such translation does not authorise an employee to perform work which requires certification or registration unless that person holds such certification or registration pursuant to the appropriate State legislation or regulation.

**4.3** No employee will unreasonably refuse to undertake training as determined in accordance with 7.2 in paid work time which would enable the employee to fulfil the substantive requirements of the skill level to which they have translated as a result of the introduction of the new classification structure.
