Industry comments
Draft native vegetation policy

To Whom It May Concern

The Bee Industry Council of WA, BICWA, provides comments on the DRAFT native vegetation policy through your online system. Thank you for this opportunity.

BICWA is the peak industry body of Western Australia and representing more than 4,000 beekeepers with a total of 52,000 hives.

The policy paper is an important document for all of industry as we rely on a healthy biodiversity and resource access. We support the overall policy context and hope that we will be invited to be involved in all strategy levels planning, collaboration and coordination. Beekeeping leaves a small footprint and delivers a high economic value.

Thank you.

Yours faithfully,

Chai
