1. Please provide your views on the proposal, including any support, objections, or suggested revisions.

No comment.

2. Please provide an assessment of whether the change will better facilitate the achievement of the GSI Objectives.

No comment.

3. Please indicate if the proposed change will have any implications for your organisation (for example changes to your IT or business systems/processes) and any costs involved in implementing the changes.

AEMO estimates that the cost to implement the rule change as follows,

	Costs (\$)	Contingency (\$)	Total (\$)
Gas Bulletin Board (GBB) Changes - development, testing and project management activities	30,000	15,000	45,000

Note: Contingency assumed to be 50% of the GBB Changes component

4. Please indicate the time required for your organisation to implement the change, should it be accepted as proposed.

AEMO estimates that it would take approximately 3 months to implement the rule change. However, AEMO would like to raise that it anticipates that there will be staffing issues during December 2022 to January 2023.

Therefore, AEMO requests that 3 months be given to implement the changes, with additional time given if the implementation time coincides with the December/January period. (see table below)

Final Rule Change Report Published	Suggested Rule Commencement Date
