

State Records Office - Archives Information Sheet

Research Assistance

The State Records Office provides a limited research service to clients who live in regional areas, interstate, overseas or who are otherwise unable to visit the State Records Office in person. The State Records Office can only undertake straightforward research that requires no more than 30 minutes staff time to answer. For more in-depth research, clients may wish to engage a research agent to undertake this work on their behalf.

The research agents listed below can be contacted to undertake research of this kind. This list is not exhaustive as it depends on the currency of information provided to the State Records Office. This list does not indicate any form of accreditation or recognition by the State Records Office. Arrangements concerning conditions and fees should be made directly between inquirers and research agents. The State Records Office accepts no responsibility for work performed by research agents.
