

Government of Western Australia
Department of Water and Environmental Regulation

WA IS PHASING OUT MANY SINGLE-USE PLASTICS.

WA is phasing out many single-use plastics, but straws are a special case. People with medical, disability or aged care needs can request a soft plastic straw from many venues or pharmacies.

Compostable alternatives are often available for everyone from venues, or you can bring your own reusable straw. Or, even better, drink from the glass or bottle.

Our small changes will make a big difference to reducing plastic waste.
