

State Design Review Panel – Biographies

Toni Neck

Director, Thinke Design

Principal Architect, Jacobs

Toni's passion and interest are in how the built environment and good design can improve the lives of the people who live in, work in, or interact with buildings, places, and spaces. Her focus is on healthcare projects, particularly acute hospitals and aged care homes. She understands the complex and varying demands that are placed on or are required by hospitals and aged care homes. Most recently, Toni was the lead health architect technical advisor for King Faisal and Prince Mohammed Medical Cities, and Project Leader for Karratha Health Campus and Karingal Green Aged Care.

Toni is an active member of the Australian Institute of Architects WA Enabling Design Committee and was a judge for the inaugural WA Architecture Awards 2022 Brian Kidd Enabling Architecture Prize which the committee established.

In 2018, her commitment to architecture with a social impact was honoured with a commendation by National Association of Women in Construction WA for the Social Responsibility in Construction Award.
