

## Alex Chapman

Hello,

I would like to make a brief submission here.

Simply put, there are a number of areas where I believe the Act needs to be clearer about conservation and protection of native species and threatened ecological communities (TECs).

In particular:

- clearing cannot proceed if it is at variance with any of the stated Clearing Principles;
- clearing in TECs disallowed entirely;
- maximum protection for Priority Species;
- more funding support for taxonomists to formally evaluate and describe the thousands of unpublished taxa;
- establish a right of appeal process to EPA determinations;
- abolish the use of offsets or strongly tighten up the use so any offsets are of equivalent ecological value.

Our remaining ecosystems are under a range serious threats - clearing and climate change perhaps the most aggressive.

I believe The Act must be upgraded to afford maximum protection to WA's unique species, communities and ecosystems.
