

## **Re: Submissions to the revision of the EPA Act 1986**

The Beeliar Group of Professors for Environmental Responsibility has just submitted a detailed response to the EPA's Discussion Paper and Draft Bill re the ACT, entitled 'Modernising the Environmental Protection Act'.

The Leeuwin Group ([theleeuwingroup.org.au](http://theleeuwingroup.org.au)) of concerned scientists has not prepared a separate submission but wishes to support and endorse the submission from the Beeliar Group, especially as a number of our members belong to both groups.

The Beeliar Group's submission is a carefully prepared and documented paper that highlights deficiencies in the current legislation and offers detailed solutions in the form of 20 Recommendations, all of which we support.

We thank you for this opportunity to add our voice to the discussion on how best to update and ensure the proper functioning of the Act.

Emeritus Professor Don Bradshaw  
Deputy Convenor  
The Leeuwin Group of Concerned Scientists
