You don't often get email from [REDACTED]. [Learn why this is important](#)

Dear Energy Policy WA Team

Great initiative, Things are getting tougher and tougher. It's very difficult to survive in current economic situations and embedded power charges are one of the killing factors of our liquidity.

Please protect the small businesses by amending the existing draconian rule.

If Shopping centers are allowed to charge embedded electricity supply the small business tenants should be allowed to buy electricity from the market as well OR please put some rule on landlords on recharging electricity charges to the tenants.

I firmly believe that the new law should be introduced to stop shopping center landlords from making profit from the embedded charges.

Dear [REDACTED]

Voluntary Embedded Networks Code of Practice Case

Submissions to the draft Voluntary Embedded Networks Code of Practice close this Friday, 23 June 2023 at 5.00pm (AWST).

Learnings from the non-binding Voluntary Code will be used to inform potential obligations on embedded network sellers under the upcoming Alternative Electricity Services (AES) framework. The AES framework aims to ensure end-use customers of new and emerging alternative electricity services access to customer protections relevant to the service being provided.

Submissions should be sent to EPWA-Submissions@dmirs.wa.gov.au.
