SENTIENT
BETTER THAN BEING THERE

Overview

We love using cutting-edge tech to do things differently, to go above and beyond for our customers and to make complex challenges simpler.

Our in-house design team leverage the latest gaming technology to create realistic, real-time 3D environments that allow teams to:

- Become better prepared through immersive training
- Make better decisions faster by bridging data visibility
- Identify development issues early by consolidating data and visual imagery

Capabilities

Reduce training time, cost and risk

with our fully interactive, custom training solutions comprising Virtual and Augmented Reality, eLearning, Instructional Design, 3D Animations and Flythroughs.

Make better decisions faster

using our Immersive Digital Twin solution, bridging data visibility across traditional silos in a real-time, easy to use virtual environment.

Identify and solve planning/ development issues

by consolidating data and visual imagery using our interactive consultation tool to support stakeholder engagement.

Differentiators

End to end design team comprising Instructional Designers, Engineers, Developers and Artists.

Cutting-edge technology solutions as one of Unity's only two Managed Development Partners in Australia.

Automated 3D model pipeline converting complex CAD models to game-ready models with best-in-class optimisation.

Proprietary large model renderer to handle massive site environments on constrained hardware.

15 years' experience providing reliable and scalable technology solutions.

100% Australian owned and self-funded, 24/7 local support.
