

OUR STORY

Established in 2014 by industry veterans Troy Ranford and Martyn Stroud, Griffin Marine Services has solidified its position as a leading provider of specialist engineering services in the marine sector, with a particular focus on Defence. In 2021, Griffin Marine Services experienced significant growth through an expanded partnership marked by the inclusion of Michael Sertorio. Michael's valuable expertise and contributions have played a pivotal role in driving the company's innovation and fostering its continued growth. With Michael on board, Griffin Marine Services has further enhanced its capabilities and positioned itself as a forward-thinking industry leader. Through his active involvement, Michael has helped shape the company's strategic direction, ensuring it remains at the forefront in the Defence and commercial industrial sectors.

Today, Griffin Marine Services boasts a workforce of over 170 highly skilled professionals, comprising a strong management team and highly accomplished operations personnel. The company continually invests in enhancing its capabilities and performance, following a "continuous improvement" approach that involves regular reviews and enhancements of processes and procedures.

This dedication to excellence is evident throughout their business practices. Recently, Griffin Marine Services appointed their inaugural General Manager, Chris Stoll, and a dedicated State Manager in each workshop location, further strengthening their leadership and operational efficiency.

Griffin Marine Services holds esteemed certifications, including DNVGL approval, ISO 9001:2015 quality assurance accreditation, ISO3834, and PCCP. With its unwavering commitment to quality, innovation, and community support, Griffin Marine Services stands as a trusted and respected leader in the marine engineering sector.

MANAGEMENT

PERTH | SYDNEY | DARWIN | CAIRNS

We take great pride in our extensively skilled and expert management team, strategically positioned throughout the country. With state managers in Western Australia (WA), New South Wales (NSW), Queensland (QLD), and the Northern Territory (NT), we ensure comprehensive coverage and support. Moreover, our teams are fortified with technical project managers from a wide range of disciplines, equipping us with the expertise needed to tackle any project effectively.

SERVICE & CAPABILITIES

Griffin Marine Services offer comprehensive support services to the Defence and Commercial sectors, catering to their specific requirements with teams of qualified and certified professionals. Our skilled workforce includes welders, boilermakers, painters, insulators, trade assistants, mechanical fitters, hydraulic specialists, load testing, and non-destructive testing (NDT). With our diverse range of capabilities, we are committed to providing exceptional services to meet the unique demands of our clients in these sectors.

OUR SERVICES

WELDING CAPABILITIES

Griffin Marine Services holds approvals from DNV and Lloyds for welding various materials, including:

- Aluminium • Stainless steel
- Copper Nickel • Duplex Stainless
- Carbon steels: D36, DH55, Grade 350

The company excels in a wide range of welding processes, including:

- GTAW/TIG • GMAW/MIG
- FCAW • MMAW/SMAW

Exotic Metals Welding and Fabrication Services

Griffin Marine Services specialises in working with high-performance alloys, such as:

- Stainless steel • Aluminium • Nickel
- Copper Nickel • Magnesium • Titanium

FABRICATION

Equipped with workshops across the nation and a comprehensive range of equipment, Griffin Marine Services can handle projects of any scale.

Their fabrication capabilities include:

- Brake Presses
- Guillotines
- Pipe Rollers
- Sheet Metal Rollers
- Drop Saws
- Band Saws
- Lathe
- Drill Press
- Mills
- Sewing Machines
- Pittsburgh/Lock Former
- Swage & Jenny

DESIGN, 3D SCANNING, CNC MACHINING

Machining is our bread and butter, and we've been doing it for a long time! Our ever-growing fleet of modern machines includes 13 Okuma CNC mills and lathes and a Fancu EDM Wire cutter operating day and night. From one-off prototypes to 10,000-part batches, we can meet your production needs in regular steel and aluminium, through to specialty metals and plastics.

We provide contract engineering design, drafting and reverse engineering services. With our high-end Creaform GoScan 3D scanner and Geomagic Design X Scan-to-CAD software, our team of drafters can reverse engineer even the most complex of mechanical assemblies.

MANUFACTURING MANAGEMENT

If you need parts made but don't know how to go about it, you can rely on us to manage your manufacturing projects. With a wide network of local and international suppliers, we can help supply sheet metal, fabrication & welding, casting, structural engineering, heat treatment, coatings, fasteners, and anything else you can imagine. Let Griffin be your one-stop manufacturing shop!

MECHANICAL / FITTING

Griffin Marine Services provides mechanical and fitting services for various components, including:

- Engine alignments
- Shafts
- Rudders
- Stabilizers
- Pumps
- Motors
- Valves
- HVAC
- Cooler Units

PROJECT MANAGEMENT

Griffin Marine Services is renowned for comprehensive project management capabilities, which ensure that every project is executed with precision and efficiency from inception to completion.

Their project management team comprises seasoned professionals who bring a wealth of experience and expertise to the table, enabling them to handle projects of varying scales and complexities with unparalleled proficiency.

By combining their technical expertise, strategic planning, and exceptional communication skills, Griffin Marine Services delivers project management solutions that consistently exceed client expectations.
