Company Overview

Taylor Marine is a 100% Australian owned and operated turn-key marine systems integrator, delivering fully customised Navigation and Communications solutions for the Defence, Merchant Marine, Offshore and Shipbuilding sectors across Australia.

With over **25 years of experience supporting Australia's defence and maritime industries**, we offer complete in-house capability—from initial RFQ through to supply, installation, commissioning and ongoing support. This enables us to deliver seamless, end-to-end project execution for even the most complex vessel requirements.

Our exclusive agency agreements with world-leading manufacturers ensure access to cutting-edge technology, global support networks and ongoing training standards that meet or exceed international maritime benchmarks.

Headquartered in Henderson, WA—in the heart of Australia's shipbuilding and sustainment hub—Taylor Marine maintains strategically located service depots and coordination centres across the country, ensuring responsive local support nationwide.

Capabilities

- Integrated Navigation & Communications Solutions
- Full project lifecycle delivery: Supply, Install, Commission and Support
- In-house project management and engineering expertise
