

MARINE INFRASTRUCTURE SOLUTIONS

GARLI
MARITIME

ABOUT GARLI MARITIME

Garli Maritime is an Aboriginal owned & operated and Supply Nation registered business. We offer a suite of specialist marine infrastructure solutions comprising an industry leading mix of highly experienced personnel, specialised plant and equipment and valuable strategic partnerships.

Comprising an industry leading mix of highly experienced personnel, specialised plant and equipment and valuable strategic partnerships, we have the capacity to design, engineer, manage and self-execute the most challenging marine projects.

We provide a broad spectrum of services including wharf and jetty design and construction, capital and maintenance dredging, aids to navigation, sub-sea pipelines, heavy fabrication, marine asset management, maintenance services and civil construction services.

Garli Maritime acknowledges the Traditional Owners of the lands throughout Australia and their continuing connection to the land, community and ancient dreaming.

We respect the Elders past and present as the keepers of the country and value the richness and diversity of Aboriginal culture across their lands.

CORE OFFERING

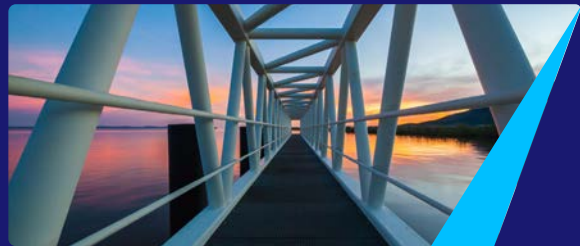

Marine Construction

Dredging &
Port Development

Harbours & Marine

Fabrication

Remediation

Civil Construction

MARINE CONSTRUCTION

Operating in the marine environment presents risks and challenges not encountered during conventional construction. We leverage our in-house skills and expertise, quality plant and equipment and strategic partnerships to provide technically sound and innovative marine construction solutions that minimise these risks.

Our demonstrated capabilities include:

- Design and construction
- Bulk cargo load out facilities
- Commercial and recreational jetties and wharves
- Fender systems
- Breakwaters and rock walls
- Asset management and maintenance

DREDGING & PORT DEVELOPMENT

Our Dredging & Port Development team specialises in partnering with clients to find cost effective and environmentally considered solutions to port expansion and maintenance requirements.

Combined with our extensive Marine Construction expertise, we are able to provide turn-key port development solutions.

Our Dredging and Port Development capabilities include:

- Capital dredging
- Maintenance dredging
- Wharf upgrades
- Channel markers
- Land reclamation
- Beach replenishment
- Sand bypassing

HARBOURS & MARINE

Our Harbours and Marine team pride themselves on providing tailored and affordable marine solutions to meet any project scope.

This means regardless of project size, every client has access to the same first class equipment and experienced personnel.

Capabilities include:

- Timber jetty construction, repairs and refurbishment, including heritage structures
- Floating pontoon design and installation
- Navigational aid design, installation, repair and maintenance
- Marine salvage
- Boat, tug and barge charter
- Mooring design and installation
- Wharf and berthing facility maintenance and repairs
- River landings, jetty and board walk design, installation, repairs and maintenance
- An array of other marine services

FABRICATION

We provide quality fabrication services supported by first class facilities and highly experienced personnel.

Combined with a long standing appreciation for the effects of the marine environment, we add significant value to the design and fabrication techniques for marine infrastructure.

Our capabilities are not only limited to marine applications and include:

- On-site and in-situ
- Medium and heavy fabrication and engineering
- Structural steel and aluminum
- Stainless steel
- Manufactured solutions

REMEDIATION

We through an alliance with Vermi-remediation Pty Ltd can facilitate the delivery of turnkey solutions for projects that incorporate remediation of contaminated soils or dredge spoil.

Vermi-remediation provide Bio remediation and Phyto-remediation services utilising bulk masses of earthworms, worm castings, biological liquids and hyper-accumulator flora. This is a new area of bioremediation that has already demonstrated outstanding success in delivering low cost and environmentally appropriate remediation on large scale projects including those with Heavy metals contamination. As an emerging remediation technology, projects are eligible for R&D tax concessions.

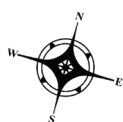

Applications include the remediation of mine sites, bio-solids, stormwater catchments, industrial and commercial sites, hydro carbon spills or storage sites to name a few.

CIVIL CONSTRUCTION

For the landside component of marine construction projects we can offer a suite of civil construction and project management services. Our Civil team is highly experienced in the delivery of a range of solutions that include:

- Project Management
- Roads
- Carparks
- Drainage
- Line Marking
- Lighting
- Landscaping
