

Password Generator Tool

(Dice Edition)

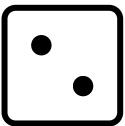

Roll dice. Build a passphrase. Keep it safe.

How it works

1. Roll **one die** to pick a category from the following pages.

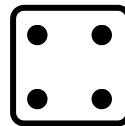

1=Colours

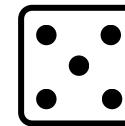

2=Animals

3=Verbs

4=Objects

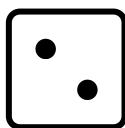

5=Nature

6=Foods

2. Roll **two dice** to pick a **word** in that category. The first die is the row (1-6), the second die is the column (1-6).

	1	2	3
1	weather	sport	holiday
2	friend	roof	soccer
3	fire	economy	painting
4	meal	measure	success

3. Repeat until you have 4-6 words.
4. Optional: add a **random number and a symbol** (see next page)
5. Store it in a **password manager** and don't reuse it elsewhere.

Why this works

- Don't include personal info (names, birthdays, addresses).
- If a word repeats or you dislike it, roll again.
- Keep passphrases private and unique per account.

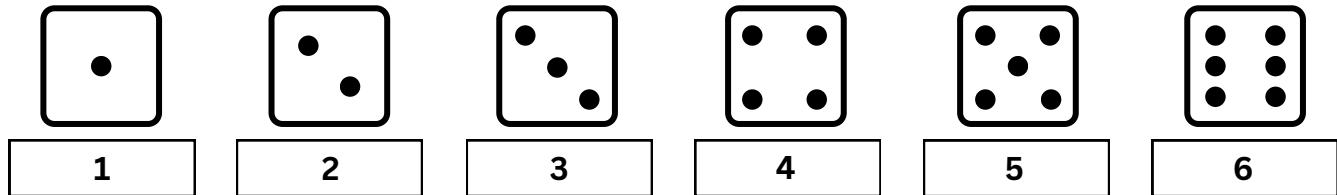

Add Optional Numbers and Symbols (Dice Edition)

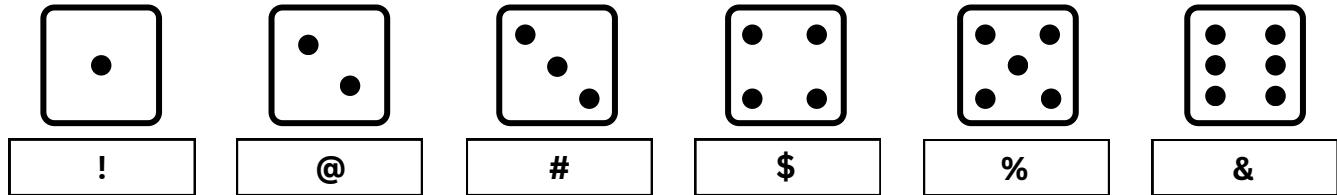

Roll dice. Build a passphrase. Keep it safe.

How it works

1. Roll a die per number, or roll two or more dice for more number possibilities.

2. Roll **one die** to pick a **symbol** from the below.

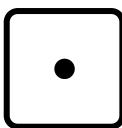

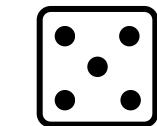

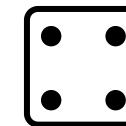

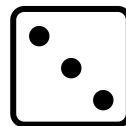

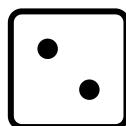

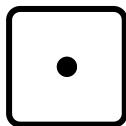

TOP TIP

Don't default to predictable patterns, such as ending your passphrase with '!' or '123'. Let the dice decide!
