

Appendix 1 TEOM and HVAS time series particle concentration data

The TEOM data in comma-separated values (CSV) tabulated format are also available on the department's website (Appendix 5).

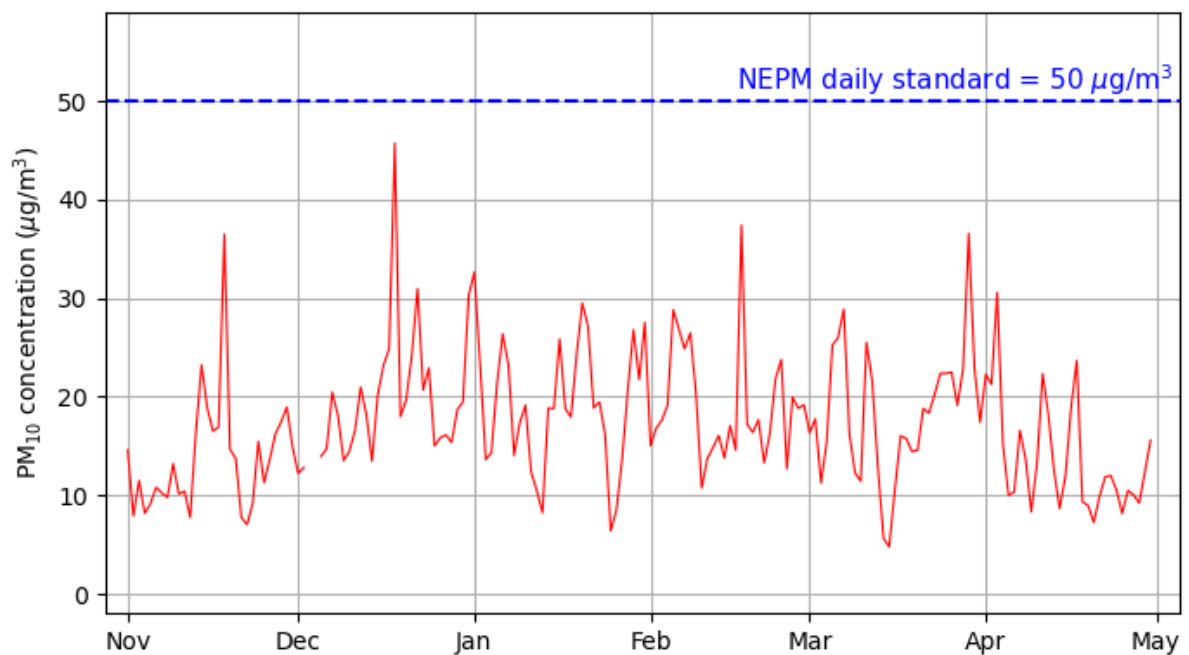

Figure A1-2 TEOM daily PM₁₀ concentrations and NEPM guideline (50 µg/m³)

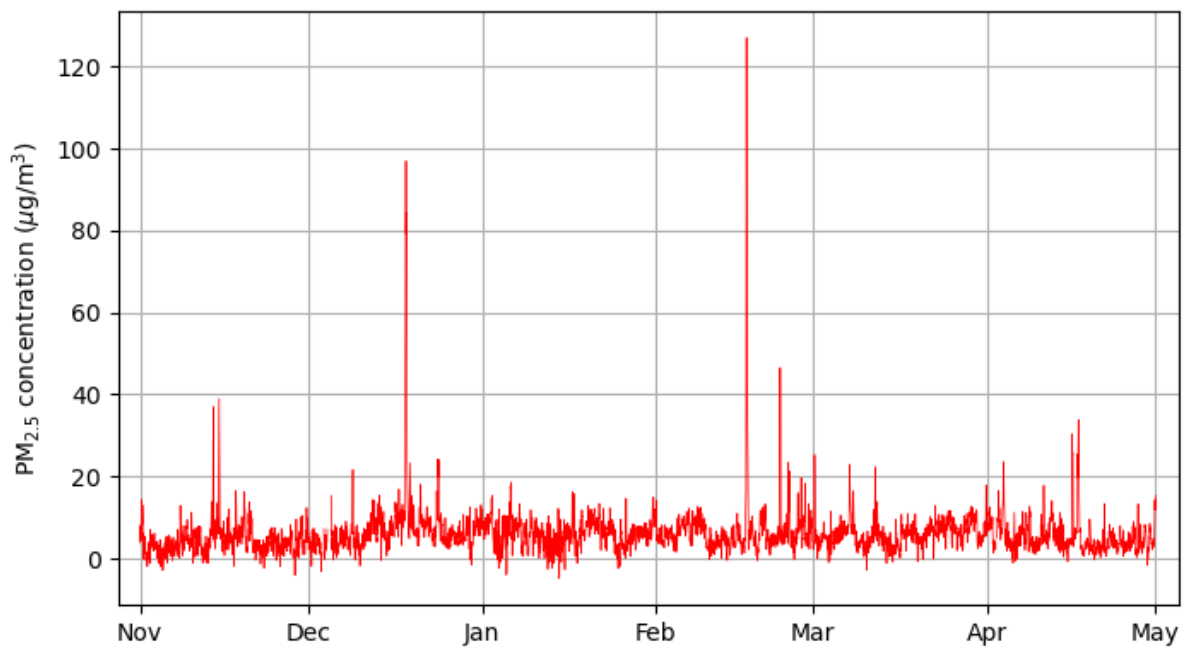

Figure A1-3 TEOM hourly PM_{2.5} concentrations

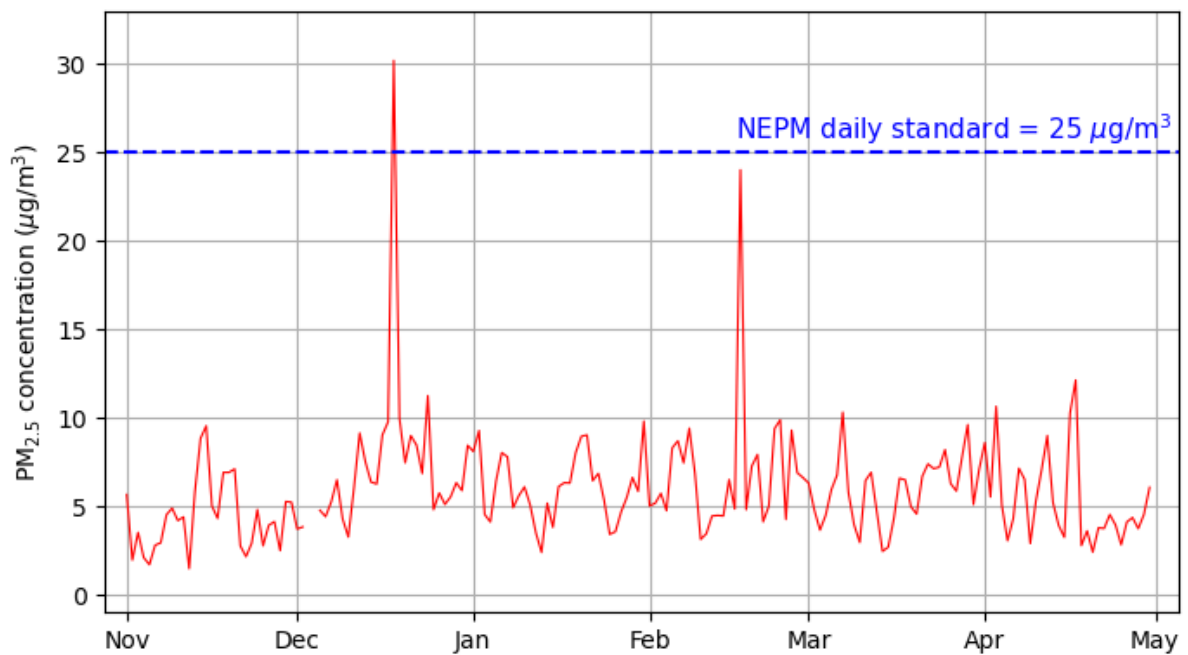

Figure A1-4 TEOM daily PM_{2.5} concentrations and NEPM guideline (25 µg/m³)

From 1 January 2025 onwards, the NEPM includes aspirational daily and annual goals for PM_{2.5} of 20 µg/m³ and 7 µg/m³ respectively; however, the daily and annual guidelines remain at 25 µg/m³ and 8 µg/m³ respectively. We have not compared PM_{2.5} concentrations recorded during the campaign against the new aspirational goals.
