

**Subject:** Comment on proposed AES regulations  
**Date:** Friday, 27 February 2026 8:33:31 AM

---

Hi,

The only comments I have are simple:

- Electricity networks previously known as “Embedded Networks” should automatically fall under the new regulations i.e. become SPN AES
- Operators of such a network who have customers with rooftop solar must reimburse/credit such customers for electricity they (the customers) export into the SPN AES system. This reimbursement/credit should be at the same rate as the customers pay the SPN AES for the electricity consumed by them.

Regards,

Customer of Embedded Network for over 20 years
