

Design | Deliver | Sustain

Founded in 2002, **Blacktree Technology™** is a wholly Australian owned and operated company, specialising in mission-critical communications.

Drawing on Australian expertise and manufacturing, we design deliver and sustain cutting-edge communication systems for military and commercial applications in urban, remote, and challenging environments.

Mission critical communications specialist

Narrowband and wideband SATCOM— from UHF to Ka bands with SATCOM-On-the-Move (SOTM) and SATCOM-on-the-Pause (SOTP) connectivity enables reliable communication in remote or challenging environments.

Terrestrial communications— Enhance your network with HF, VHF, UHF systems and microwave for robust connectivity.

RF component manufacturing— precision in-house manufacturing of highly specialised components including advanced antennas, versatile components including advance of deployable systems, robust mounting solutions, precision filters, and efficient signal combiners.

Monitoring and management—ensure flawless performance with advanced isolation devices, safety management systems, power measurement tools, and signal direction indicators.

Solution design through to support design

Design

From pinpointing solutions to engineering systems and selecting technologies, we customise solutions to meet your communications needs.

Deliver

Management, seamless procurement, precision manufacturing, and thorough integration, ensure low-risk, validated installation and system commissioning.

Sustain

Lifelong maintenance, OEM support, legacy product care, obsolescence management, and tailored training for your operators and maintainers.

Key discriminators

Proven partner to Defence

Acquisition and support contracts, including narrowband support services contract.

In-house manufacturing capability

Secure facilities
Advanced electronics workshop (Perth)
Secure integration facility (Canberra).

Full vertical system integration

Comprehensive end to end, integrated solutions.

Specialised Training Services

UHF SATCOM maintainer and operator training, specifically developed for the ADF.

Industry leading

Key Customers & Sectors

- Australian Defence Force
- NATO
- Global Defence Prime Contractors
- Domestic and international Governmental agencies
- Commercial telecommunications, space, resources and industrial sectors

Accreditations

- 📄 Triple certified Integrated Management System
- 📄 Defence Export Controls compliant
- 📄 NATO/National Stock Numbers for critical products
- 📄 Defence Industry Security Program (DISP)
