## KEY DISCRIMINATORS

**100%** Australian owned and operated

**500+** personnel **50+** years of experience

- > End-to-end mission-ready capability
- > State-of-the-art East Coast and WA workshops
- > Australia-wide logistics and delivery capabilities
- > Advanced, large-format fabrication technologies
- > Proven track record of safe, high-quality major projects nationwide, partnering with clients to minimise timeframes, downtime and costs.

## KEY CAPABILITIES

**Engineering Design**

From concept to completion

**Fabrication & Manufacturing**

Industry-leading East Coast and WA workshops

**On-Site Services**

Complete installation, maintenance and shutdown solutions

**Construction**

Extensive experience in industrial construction projects

**Equipment Hire**

Large inventory of equipment with qualified operators

### Leading-edge, large-scale fabrication tech:

Over 10,000sqm of state-of-the-art workshop space, with specialist technicians providing large-format, high-precision processing and machining capabilities. This includes:

- > Advanced robotic fabrication and welding
- > Structural steel processing
- > Large-format laser and plasma cutting
- > 100-tonne heat treatment furnace
- > Blasting, painting, coating and galvanising

## KEY CUSTOMERS

Our client list and project portfolio spans the mining, resources, infrastructure and defence industries. We're the trusted heavy-industry engineering partner for Rio Tinto, BHP, Iluka, Metso and many more.

### Accreditations:

- > NATA accredited
- > ISO9001 (Quality Management Systems)
- > ISO 14001 (Environmental Management System)
- > AS/NZS 4801 (Occupational Health and Safety Management Systems)
- > Defence Industry Security Program (DISP) membership pending
