

DomeShelter Australia is a leading Australian manufacturer of high-quality, fabric-covered structures, engineered to withstand the world's harshest environments. With over 30 years of experience and projects delivered in more than 50 countries, DomeShelter™ Solutions provide durable, fit-for-purpose shelter systems trusted by the defence sector and a wide range of industries globally.

## Capabilities

- **Rapid-deployment, relocatable infrastructure:** container-mounted or freestanding designs for fast setup and redeployment.
- **Versatile applications:** suitable for ammunition shelters, weapons system hides, hangars, workshops, maintenance bays, personnel facilities and other defence applications.
- **Engineered for extreme conditions:** rated to withstand wind-speeds of up to 260 km/h (severe cyclonic).
- **Operational flexibility:** ideal for expeditionary air operations, remote bases, or interim infrastructure.
- **Through-life support:** inspections, spares & maintenance, disposal services.

## Industry Customers

Australian Government  
Department of Defence

## Discriminators

- **Proven global track record:** over 8,800 shelter solutions delivered to over 50 countries.
- **End-to-end expertise:** in-house consultants guide every stage of project development.
- **Fit-for-purpose focus:** tailored solutions engineered to meet specific operational requirements.
- **Award winning service:** recognised for market-leading customer experience and service (AIM WA Pinnacle Awards).
- **Australian-made quality:** designed and manufactured to rigorous Australian engineering standards.
