

Unmanned vessel operations, sustainment and regulatory enablement

## Capabilities

- Fleet operations and deployment
- Fleet management, leasing and sustainment
- Maintenance, repair and overhaul
- OEM-approved training and regulatory licensing
- Program and project delivery
- Insurance and risk management

## Key Partners

## Differentiators

- Drone-agnostic operations
- End-to-end lifecycle ownership and support pathways
- Regulatory expertise embedded in delivery
- Rapid mobilisation and scalable fleet models
- Dedicated operational support personnel
- Defined service-level agreements (SLAs)

## Use Cases

- Border, maritime and coastal surveillance
- Critical infrastructure monitoring
- Environmental and disaster response
- Training, testing and evaluation programs
- Persistent ISR support operations
