

WHAT CAN FERRO-CLEAN DO FOR YOU?

Ferro-Clean is one of Australia's most experienced providers of abrasive blasting and painting. Founded in 1966 by Ernie Wibberley, Ferro-Clean has grown steadily to become one of WA's largest protective coatings applicators, with services including:

- > The ability to blast & paint over 270 tonnes of structural steel per week
- > 3 blast & paint lines for structural steel, handrail, platework & pipes
- > 4 custom-designed painting facilities across Perth Metro
- > Facilities for oversize items in Kwinana Industrial Area, near Henderson Defence Precinct
- > Spray booth with extraction for automotive finish on vehicles and equipment
- > In-house rubber lining and ceramic tiling department, for wear linings
- > Labelling and packaging services to prepare for transport or sea freight
- > Team of certified quality assurance inspectors and supervisors
- > Assistance with specifications and recommended paint products

THE FERRO-CLEAN POINT OF DIFFERENCE

Over the past 60 years, Ferro-Clean has worked with defence contractors and EPCs, providing high-quality protective coatings application and abrasive blasting services.

Ferro-Clean is a Western Australian owned and operated business, now in its 3rd generation of family management, with ISO 9001 certification & multiple staff with NACE Level 2.

To assist the shipbuilding industry, Ferro-Clean has designed an automated blast & paint line for flat or curved steel plate. This allows highly consistent results when applying coatings such as weldable primers, even at very low film thicknesses.

A focus on quality has meant Ferro-Clean is highly regarded by many third-party inspectors. Our quality systems provide 100% traceability and confidence when tracking items. A full suite of QA documents can be provided to ensure you have complete confidence.

WHY YOU CAN RELY ON FERRO-CLEAN

Founded in 1966 in WA, Ferro-Clean has been operating for 60 years as a high-quality provider of abrasive blasting, protective coatings and wear linings.

Well respected within the mining, oil & gas industries, and trusted for large projects including:

- > Eleven 2,000+ tonne jobs in the last few years
- > BHP's Wind Fence in Port Hedland, and Jimblebar mine infrastructure
- > Rio Tinto's Cape Lambert expansion, Nammuldi and Gudai-Darri mine infrastructure
- > Handrails and safety products for Pluto, Wheatstone & Gorgon LNG plants
- > Historical projects such as North West Shelf LNG, Murrin Murrin & Olympic Dam mine

Ferro-Clean is trusted by large EPCs and defence contractors such as Austal, Cimvec, Bluescope and many others, as well as many reputable steel fabricators in Western Australia.

Ferro-Clean has applied for DISP (entry level) and has had ISO 9001 certification for more than 10 years, with ISO 45001 & ISO 14001 currently in progress.

WHAT CAPACITY AND CAPABILITY DOES FERRO-CLEAN HAVE?

- > Ability to treat over 270 tonnes of structural steel per week
- > Facilities to process over 1 kilometre of handrail per week
- > In-house rubber lining and ceramic tiling department
- > Handling equipment for long lengths over 30 metres
- > Blast chamber can fit items 9 m wide, 7 m high, 35 m long
- > 2 of the largest blast machines manufactured in Australia
- > 5 permanent blast rooms using both grit & garnet abrasives
- > Lifting capacity includes dual lift 20 tonne overhead cranes
- > Several large forklift trucks at each workshop
- > Multiple 8 tonne mobile cranes and access equipment
- > 16,700 m² undercover painting area
- > 15,500 m² laydown/storage area
