

# INTERCEPT AUSTRALIA

... simply better protection!

## COMPANY / CAPABILITY OVERVIEW

- Intercept Australia can supply a wide array of anti-corrosion & anti-static films, shrink films, bags, foam and covers to preserve equipment of any size or shape during storage or for logistical purposes.
- Equipment, critical spares and optronics can be protected for indoor or outdoor storage. Products are safe to use, eliminates the need for oiling and chemical degreasing saving man hours readying equipment for immediate use.
- Select from off the shelf sized bags for smaller components, alternatively customised bags or re-usable anti-corrosion canvas covers can be manufactured in our Perth facility.
- Raytheon Equipment Division, USA, has recommended Intercept for use in ESD protection and or corrosion protective applications both program and company wide.
- All materials are equally protected – only one packaging material for all preservation applications.

## COMPETITIVE DISCRIMINATORS

- Intercept is the only anti-corrosion technology comprised of highly Reactive Copper particles bonded into a Polymer matrix (RCP).
- This matrix film forms a preferential corrosion site that reacts and neutralises all corrosive gases that pass through or come in contact with the film.
- It is statistically improbable that they (corrosive gases) can migrate through the Intercept film without contacting and reacting with one of the active corrosion sites.
- Intercept Australia is the Licensee for Intercept products in the S.E. Asia-Pacific region.

## CERTIFICATIONS / ACCREDITATIONS ISO

9001:2015. Lean Six Sigma Accredited.

**Intercept packaging does not off gas solvents or chemicals, is worker and airfreight safe, returnable, reusable and fully recyclable ...simply better protection !**

## CAPABILITY

- Corrosion Control
- Inventory Management (Critical Spare Parts)
- Logistics
- Preservation Packaging
- Warehousing & Storage
- Asset Management
- Equipment Maintenance & Sustainment

## PARTNERS & CUSTOMERS

Intercept Australia oversees and supplies all distributors covering the S.E. Asia-Pacific region. Examples of regular Australian client activity include: BHP Billiton, FMG, Chevron, Hoffman Engineering, Penske Australia (MTU), BAE Systems Australia, Raytheon, Luerssen, Komatsu, Westrac, Rio Tinto, GE Oil & Gas, Toll Group, CIVMEC, Progress Rail, National Museum & Art Gallery Australia. Defence examples: Intercept shrink wrapping of Navy Engines, MK45 Gun & Load Assemblies, RAN Sea Sprite helicopters; Intercept canvas crate liners for RAN Sea King tail rotor storage; Intercept Shrink wrapping of DSS33 Antennae Dish & components for Raytheon—sent from Canberra to NASA, USA. Raytheon use Intercept Bags & Films for preserving critical warehouse items in storage (especially for sustainment of Collins Class spare parts held in Perth e.g., Compact Flash Cards, EPIRB's, Comms cables/ servers, radars).
